Education

Master of Science in Business Analytics   August 2025
Hult International Business School | [Boston, Massachusetts]
- Relevant Courses: Course Title, Course Title
- [Member/Position Title] of [XXX Club/Organization/Team]

Bachelor of Engineering in Information Science   August 2022
Presidency University | Bangalore, India
- Concentration in [Computer Science]

Technical Skills

Data Analysis & Visualization: Exploratory Data Analysis (EDA), Data Cleaning, Data Wrangling, Statistical Analysis, A/B Testing, Data Mining, Hypothesis Testing
Programming Languages & Tools: Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow), R (dplyr, ggplot2, caret), SQL (PostgreSQL, MySQL), SAS (Essentials 1 certified), Spark, Tableau, Power BI, GitHub
Big Data Technologies: Apache Spark, Hadoop, AWS (S3, Redshift, Lambda, EC2)
Softwares & Applications: Jupyter Notebooks, VS Code, PyCharm, FluidSurveys, Microsoft Excel (Pivot Tables, VLOOKUP, Macros), Microsoft PowerPoint (Data Storytelling)

Relevant Experience

Cadential Technologies Private Limited | Bangalore, India   October 2022 – August 2024

Junior Data Analyst. Responsible for collecting, cleaning, and analyzing large datasets to uncover insights, and support data-driven decision-making through visualizations, predictive models, and automated reports.

- Analyzed large datasets to identify trends, patterns, and anomalies, providing insights that supported data-driven business decisions. **Created** and maintained dynamic dashboards using Tableau and Power BI.
- Created and maintained dynamic dashboards using Tableau and Power BI, enhancing the visibility of critical business metrics, key performance metrics in real-time, improving stakeholder reporting efficiency by 30%.
- Cleaned, transformed, and validated data for ETL pipelines, ensuring 100% accuracy in downstream reporting systems.

Cadential Technologies Private Limited | Bangalore, India   April 2022 – Oct0ber 2022

Data Analyst Intern. Responsible for assisting the data analysis team in collecting, cleaning, and organizing data for various projects. Supported senior analysts in generating reports, creating visualizations, and conducting basic statistical analyses to provide actionable insights for internal teams and stakeholders.

- Collaborated with team members on data validation tasks to improve the reliability of key business metrics.
- Assisted in gathering and cleaning raw data to ensure accuracy and consistency for analysis and reporting.
- Prepared data visualizations and reports to aid in decision-making processes.

Relevant Projects

Project: eRange, Client: eClerxl | Bangalore, India   October 2022 – August 2024

- Developed interactive dashboards to visualize key metrics and product performance trends, helping the client identify underperforming items and optimize product offerings, resulting in improved inventory allocation.
- Performed data cleaning and preprocessing of large product datasets, improving data accuracy and enabling more precise digital assortment recommendations.
